EX NO : 2	MAVEN INSTALLATION AND JAVAFX APPLICATION
DATE :	

AIM :

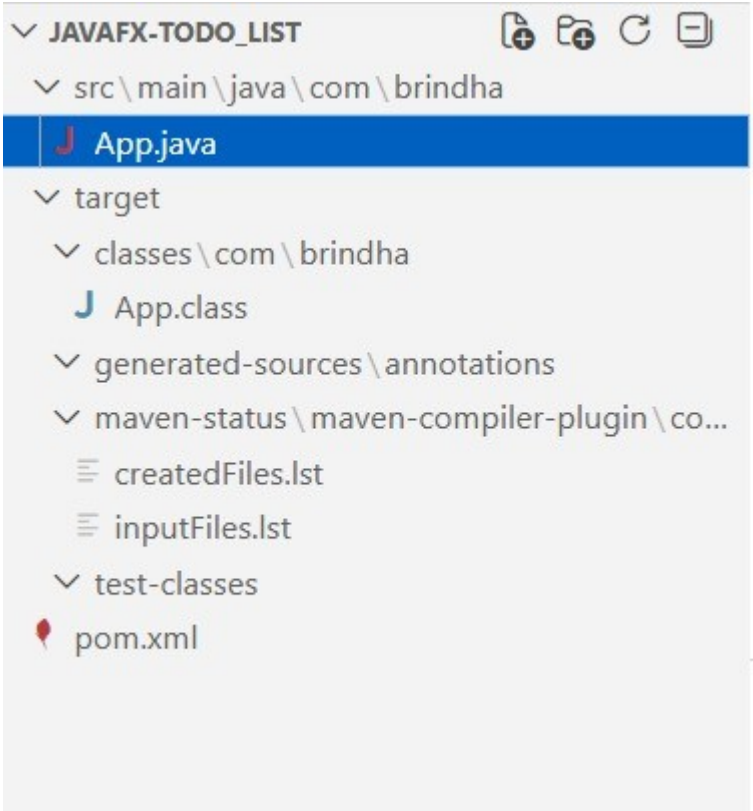
To install Apache Maven and to develop and execute a simple javaFX based application using Maven as the build and dependency tool

PROCEDURE :

1. Install JDK (JDK 17)
2. Download and Install Apache Maven
3. Set Environment Variables
4. Verify the Maven installation using the command **“mvn -v”**

5. Create a Maven Project using the following command

   “mvn archetype:generate -DgroupId=com.brindha -DartifactId=javafx-TODO_LIST -DarchetypeArtifactId=maven-archetype-quickstart -DinteractiveMode=false”



6. Navigate to your project directory after the completion of above command
7. In your project directory, configure **"pom.xml"** for javaFX
8. Write your javaFX code inside the **"src/main/java/com/Brindha/App.java"**
9. Run the application using **"mvn clean javafx:run"**

```
PS E:\javafx-todo_list> mvn -f e:\javafx-todo_list\pom.xml javafx:run
[INFO] Scanning for projects...

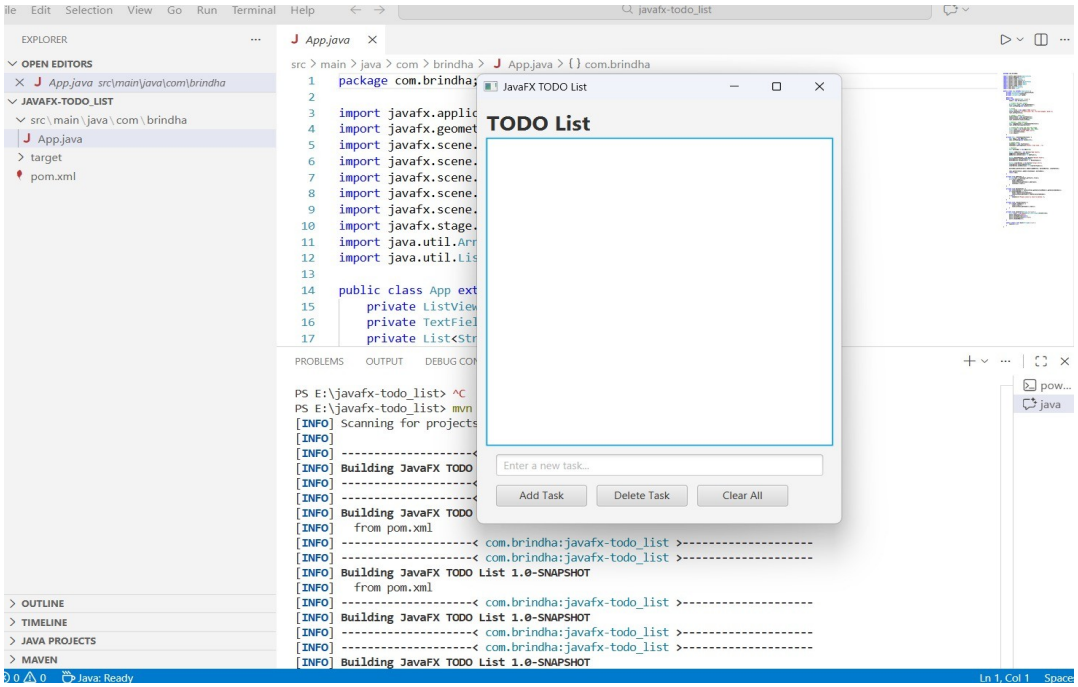
[INFO] --------------------< com.brindha:javafx-todo_list >--------------------
[INFO] Building JavaFX TODO List 1.0-SNAPSHOT
[INFO]   from pom.xml
[INFO] --------------------------------[ jar ]---------------------------------
[INFO]
[INFO] >>> javafx:0.0.8:run (default-cli) > process-classes @ javafx-todo_list >>>
[INFO]
[INFO] --- resources:3.3.1:resources (default-resources) @ javafx-todo_list ---
[INFO] skip non existing resourceDirectory e:\javafx-todo_list\src\main\resources
[INFO]
[INFO] --- compiler:3.11.0:compile (default-compile) @ javafx-todo_list ---
[INFO] Changes detected - recompiling the module! :input tree
[INFO] Compiling 1 source file with javac [debug target 21] to target\classes
[INFO]
[INFO] <<< javafx:0.0.8:run (default-cli) < process-classes @ javafx-todo_list <<<
[INFO]
[INFO]
[INFO] --- javafx:0.0.8:run (default-cli) @ javafx-todo_list ---
```



RESULT :

Thus the installation of Maven and a simple application using javaFX has been implemented and executed successfully
