About
I craft fast, accessible and beautiful web experiences. I love turning complex problems into simple, elegant interfaces.
Who am I?
I'm Amritha Jeganeeswaran, currently pursuing my B.Tech in Information Technology (3rd year). I build end-to-end web apps with React, Node.js and MySQL. I'm comfortable with Git commands for collaboration, Postman for API testing, and Render for deployment. I also use Cursor AI to speed up development and keep my workflow efficient.
Projects
4+
Hackathons

Focus
Full-Stack
Highlights
Clean, modern UI with dark/light theme and micro-animations
Authentication, dashboards, REST APIs and MySQL data models
Project filtering, quick preview modal, and responsive layouts
Email contact form powered by EmailJS (no backend needed)
Skills
Animated progress bars that fill on scroll.
